Nayeong Kim

grace12021@gmail.com
nkim10@sfsu.edu

Education

AUG 2021 - JUL 2023(Expected)
San Francisco State University, Master of Arts
Mathematics

MAR 2016 - AUG 2021
KAIST, Undergraduate
Major in Computer Science, Second Major in Mathematical Science

MAR 2012 - FEB 2015
Korea Science Academy of KAIST
High School

Experience

DEC 2020 - MAR 2021
Moloco, Seoul, Korea
Software Engineering Intern
Backend Engineer in the Moloco Cloud team.

JAN 2020 - FEB 2020
Google, Seoul, Korea
Software Engineering STEP Intern
Developed a virtual testing library for MediaRouter in Androidx as part of the Android Media APIs team.

Research

SEP 2020 - MAR 2021
Individual Study, KAIST
with Professor Ji Oon Lee
Studied random matrices and their applications in community detection.

MAR 2020 - AUG 2020
Individual Study, KAIST
Visual Computing Lab, with Professor Min H. Kim
Developed and implemented an auto-focusing algorithm for the cameras used in the lab's light stage equipment. Solved a light position calibration problem for the light source and mirror ball in the lab's light stage equipment by extending modern techniques for light source estimation.

JAN 2019 - JUL 2019
Undergraduate Research Program, KAIST
Users & Information Lab, with Professor Alice Oh
Crawled Blue House(Office of the President of South Korea) petitions and bills of the National Assembly of South Korea using their public data APIs. Analyzed and visualized the data using pandas and matplotlib.

Projects

SEP 2020 - DEC 2020
App for Cat Face Recognition
Group Project for Introduction to Artificial Intelligence
Developed an app for cat face recognition. Used OpenCV for data preprocessing (face detection and crop) and fine-tuned a pretrained ResNet model for cat face recognition. Served the model on a Flask server for the final app. Individual contribution: Preprocessing data and implementing the server.

SEP 2020 - AUG 2020
Coursework
Individual Project for Mathematical Foundations for Artificial Intelligence
- Classification of Eye Blinking using Logistic Regression and Linear SVM
- Comparison of Linear Regressions Using Different Regularizations: Ridge, Lasso
- Blob Clustering Using Mean Shift Clustering
- Comparison of NMF and PCA

Awards and Scholarships

Courses Taken

Computer Science
- Discrete Mathematics
- Data Structure
- Introduction to Algorithms
- System Programming
- Introduction to Computer Graphics
- Computer Graphics
- Introduction to Computer Vision
- Programming Language
- Computer Organization
- Introduction to Artificial Intelligence
- Theory of Programming Languages
- Intelligent Robot Design and Programming
- Operating Systems and Lab
- Introduction to Logic for Computer Science

Mathematical Science
- Introduction to Linear Algebra
- Linear Algebra
- Probability and Statistics
- Analysis 1, 2
- Complex Variables 1
- Elementary Probability Theory
- Combinatorial Topology
- Modern Algebra 1
- Mathematical Statistics
- Lebesgue Integral Theory
- Mathematical Foundations for Artificial Intelligence

Skills

Languages
- Python
- Java
- C++
- Scala
- Matlab
- LaTeX
- go
- R

Frameworks/Libraries
- Pytorch
- Flask
- Pandas
- Matplotlib
- Scikit-Learn
- Numpy/Scipy
- OpenGL
- OpenCV
- jekyll
